Integral wire manager

Kavi concealed caster

Novi concealed caster

Reto concealed caster

The Standards collection includes X, T, C and post type bases in static, folding and flip versions with locking casters or glides. We offer lounge, standard/dining, bar, and custom fixed heights. Novi is available with spring clip, ratchet, crank or electric adjustable height options. Our concealed caster option (available with Kavi, Novi and Reto bases) provides a mobile solution with two advantages over traditional casters. Tables have a fixed ap-

pearance and there is no need to lock or unlock casters each time the tables are moved. The integral wire manager option (Reto column shown) features a spring loaded self closing wire access door integrated into the base column. This allows easy access while concealing and protecting your cables. Symphony offers table locks, carts, plus a variety of power/data and wire management solutions to complement the Standards collection.
